***COMMERCIAL PRODUCTS PRICE LIST***  
***Effective 1/1/2023***

**PREPAR3D V5 - PROFESSIONAL PLUS LICENSE – \$2,500.00**

**PREPAR3D V4 - PROFESSIONAL PLUS LICENSE – \$2,300.00**

- Training meets reality with Lockheed Martin's Prepar3D® Professional Plus simulation software.
- Customers around the world rely on Prepar3D for immersive, experiential learning.
- Professional Plus offers advanced users a platform to:
- Experience combat scenarios involving a complement of weapons and sensors
- Program artificially intelligent (AI) behaviors in scenarios
- Utilize the Multichannel capability to increase performance on multi-screen and dome setups by running concurrently on multiple systems
- Connect to a Distributed Interactive Simulation (DIS) network session and integrate with other simulators
- Support for the most popular Common Image Generator Interface (CIGI) packets
- Control multiplayer scenarios and modify role-players in real-time using SimOperator
- Experience a mission before it happens to increase effectiveness and reduce response time
- Learn and test their knowledge in the same environment in which they will operate
- Re-create scenarios with operational data and experiment with different variables
- Train for scenarios in aviation, air traffic control, ground vehicle operation and disaster response

***AVATAR COMPUTING***  
***CLEARPATH BIDDER'S LIBRARY - \$85,000***

Bidder's Library provides a secure web environment that empowers program offices and their contracting activities to manage requirements information within a closed group of vendors. The Bidder's Library solution complements the government acquisition workflow by fencing off documentation meant for controlled groups of vendors within large OTA or IDIQ contract vehicles.

By using Bidder's Libraries for your program, you gain a dedicated and secure web experience that is only accessible by approved users such as program participants and awarded schedule holders. In this environment you can control the access to any requirements and keep industry partners fully engaged as new information comes out.

Bidder's Libraries will be seen by your schedule holders as the hub of all your program's pertinent information including data repositories that can be secured to specific domains of vendors. Your Bidder's Library can be customized to fit any organizational need you have.

Even more important, the Bidder's Libraries provide a streamlined way for your acquisition centers to post new requirements, RFIs, PWSSs, RFWPs, Draft RFPs, Q&As, Past performance questionnaires, cost templates and much more. Contracting professionals can automate the notifications to relevant vendors and secured groups of vendors for export-controlled documentation. All of these features have a dramatic impact on speeding up the execution of your program requirements and automating tedious manual labor. Bidder's Library is designed to create a persistent record of the data lasting the life of the program and not dependent on any one individual.

### ***CLEARPATH BIDDER'S LIBRARY MAINTENANCE - \$15,000***

Clearpath Bidder's Library maintenance includes the proper routine upkeep of databases and system files, error-detection, bug-fixing, upgrades, capacity enhancements or removal of obsolete functions. Maintenance includes DoD and agency compliance including controls, requirements and policies for network access and Standard Technical Implementation Guides (STIG).

### ***CLEARPATH TRAVEL APP - \$50,000***

Clearpath | Travel is a software solution that manages contractor travel in a single, concise workflow. Developed by AVATAR Computing, our solution provides a secure web environment that is dedicated to the approval workflow for a single program or contract vehicle. Your government office is not bundled into a pool of other groups. Instead, you have a single, clean application that manages your contractor travel. This workflow can be tailored to your organizations specific needs and can support a full spectrum of travel needs from approvals to full service ticketing and management.

By working through Clearpath | Travel you gain the ability to access all your organizations contractor travel from one location, regardless of staff turnover or assignment. It also provides the vendors with a tracking and reporting mechanism for their travel in one place.

Completed travel can be exported as a preformatted trip report, auto filling all the travel info that pertains to that respective trip, ultimately streamlining the trip report process for your contractors.

## ***CLEARPATH TRAVEL MAINTENANCE - \$10,000***

Clearpath Travel maintenance includes the proper routine upkeep of databases and system files, error-detection, bug-fixing, upgrades, capacity enhancements or removal of obsolete functions. Maintenance includes DoD and agency compliance including controls, requirements and policies for network access and Standard Technical Implementation Guides (STIG).
